

KENTUCKY BLUEGRASS
FULL MOON
Poa pratensis

Description:

Full Moon is a hybrid that traces to Unique, Limousine and Midnight. It has a rich dark green color, with a medium-fine leaf texture. This variety has good heat and drought tolerance making it a good blend component with tall fescue and other bluegrasses.

Applications:

Full Moon has good winter color and good summer performance with it's heat and drought tolerance. This makes it a good blending component. It's dark green color and rust resistance makes it useful in blends with dark blue colored bluegrasses and Perennial ryegrass. The high Seed yield potential of Full Moon helps to insure that it will be in production and available for markets worldwide.

Geographical Adaption:

Full Moon is adapted to well-drained soils with a pH of 5.5-7.5. Full Moon performs well in the Northern climates down through the transitional zones of the United States and in Europe and China. Fertilize at 3-4lb N/1000 sq. ft. /year. Mowing height 1.5-2.5 " Irrigate deeply and infrequently in absence of rainfall.
