

Outstanding Low Fertility Performance

- ✓ Inherently drought tolerant
- ✓ Fine leaf texture with medium-green color
- ✓ Excellent shade tolerance

EcoStar hard fescue (*Festuca brevipila*) has excellent shade tolerance and superb summer density and color. It maintains a medium-green color under close mowing conditions -- even down to 1 in. (2.54cm). Recommended for low maintenance mixtures on roadsides, boulevards, out of play and rough areas on golf courses, or areas hard to reach with the mower.

Winter Hardiness: **EcoStar** is sturdy enough to withstand the Northern cold as well as the heat of the upper South.

Good Turf Quality: In university trials, **EcoStar** received the top rating for finest leaf texture and was ranked highly for least amount of summer discoloration and winter turf density under drought conditions.

Disease and Pest Resistance: **EcoStar** also received the #1 ranking for brown patch resistance, resistance to dollar spot, good resistance to leaf spot, red thread and summer recovery from drought in various university trials.

Seeding Rate:
 Maintained at turf heights: 4-6 lb/1,000 ft² (20-30 g/m²)
 Unmown areas: 20-40 lb/acre (25-45 kgs/ha)
 Overseeding into existing turf: 6-10 lb/1,000 ft² (30-50 g/m²)
