FOR A GREAT ALFALFA

NSF 8011 Q Plus

Quality Plus Yield

This variety is a multi-foliolate variety with excellent winter hardiness. NSF 8011 Q Plus offers the producer high quality with outstanding digestibility along with high yield. NSF 8011 Q Plus is adapted to perform across the fall dormancy 3 and 4 production areas. This variety shows lower lignin traits under good management. NSF 8011 Q Plus has fast recovery and has an excellent agronomic package that provides persistence over a broad range of soils. This variety will respond well to aggressive management on productive soils.

Agronomic Characteristics

Winter Survival Index	1.8
Recovery	Extremely Fast
Wisc. Disease Rating	35/35
Leaf to Stem Ratio	Excellent
Fall Dormancy	4.5
Multi-Foliolate Expression	Yes
High Digestibility	Yes

Disease and Pest Resistance

Byan Kress
Winthrop, IA

"I am a commercial hay producer, therefore quality and longevity is important to my operation. The NSF 8011 Q Plus exhibited tolerance to drought. We had 3 weeks of no rain and it survived very nicely. This stretch of hot dry condition, the NSF 8011 Q Plus had very fine stems and the stem to leaf ratio was consistent through all these cuttings."

Jeff Beckman
Dennison, MN

"I planted late this spring because of the wet conditions we had in southern Minnesota. With the late planting I had 3 cuttings. I was impressed with the quick recovery. I had my Alfalfa tested by Dairyland Laboratories in Arcadia, Wisconsin. My RFQ was 167.37, lignin 6.46 and crude protein at 22.18%. I am in the dairy business and I need quality hay. I am very pleased with the NSF 8011 Q Plus Alfalfa."
