

70/30 OVERSEED MIXTURE

Premium Grass Seed for Overseeding Applications

70/30 Overseed Mix*

20% Jumpstart Kentucky Bluegrass
20% Endurance Kentucky Bluegrass
30% Tirem Kentucky Bluegrass
15% Gray Hawk Perennial Ryegrass
15% Manhattan 7 Perennial Ryegrass
*Or equivalent depending on availability...

KEY FEATURES

- High wear tolerance
- High recovery rate
- Disease resistant (gray leaf spot, brown patch, red thread, and rust)
- Outstanding turf quality
- Dark green color
- Low mowing heights

70/30 Overseed Mix is a combination of improved Kentucky Bluegrasses and fine-textured Perennial Ryegrasses. It is designed for superior turf quality in full sun to light shade. It will require medium to high management to reach its full potential. Many golf course fairways, home lawns and other turf areas are planted with this mixture where superior turf quality is required. This combination of Kentucky Bluegrasses and fine-textured Perennial Ryegrasses has proven to be a combination that provides improved disease resistance, great color and plant density. This mixture will perform at a high level on most soils, from high sands to heavier clay soils where medium to high levels of fertilization and regular irrigation is available. The best results will be achieved with medium to high management levels which will give the turf good color and density. 70/30 Overseed Mixture is an excellent choice for turf areas that are managed by professionals and others who demand high quality turf and are willing to provide the inputs to achieve those goals.

Recommended Use

70/30 Overseed Mix is suited for those turf area where quality is demanded and management levels support the best possible results. It can be used for nearly any turf area that receives full sun to light shade and receives medium to high levels of management.

Suggested Maintenance

Best results are achieved with two or more fertilizations per growing season and irrigation that is sufficient to promote healthy growth throughout the growing season. The recommended mowing height is 1.5 – 3 inches although it will perform at slightly lower heights of cut if managed properly.

Seeding Rates

- New turf: 4 – 6.3 lbs./1000 sq. ft. (175-275 lbs/acre)
- Overseed Rate: 3 - 4 lbs/1000 sq. ft. (150-175 lbs/acre)

Establishment

- Germination: 7-15 days under ideal conditions
