

STREETS (Salt Tolerant) SEED MIXTURE

Salt Tolerant, Disease Tolerant, Drought Tolerant Mix

STREETS Seed Mix*

20% Seabreeze GT Creeping Red Fescue
 20% Celestial Creeping Red Fescue
 20% Moonlight SLT Kentucky Bluegrass
 10% Marco Polo Sheep Fescue
 10% SR3150 Chewings Fescue
 20% Saltillo Tall Fescue

*Or equivalent depending on availability...

KEY FEATURES

- Salt Tolerant
- Heat Tolerant
- Shade Tolerant
- High Stress and Drought Tolerant
- Low Vertical Growth Habits
- Greater Seedling Vigor and Rapid Establishment
- Excellent turf Quality with Early Spring Green Up

STREETS Seed Mixture is a combination of salt tolerant grass seed varieties tested and selected by MNDOT and PURE SEED TESTING, Inc. to perform along roadsides that receive salt treatments during the winter months. Do not confuse tolerant with resistance. The plant will be able to take a certain amount of salt before it starts to decline. This mixture will perform nicely on a variety of soil conditions besides salt. The combination with the fine and tall fescue will result in a very drought tolerant lawn seed mixture. Fertilizer and water requirements can be reduced once the lawn is established. This mixture will adapt to full sun to reasonably heavy shade conditions.

Recommended Use

STREETS Seed Mixture is ideal for sod production, home lawns, parks and curbsides. This mix is an alternative option to other Twin City Seed Mixtures where higher levels of road salt are a concern, irrigation does not exist, and soils are less than ideal.

Suggested Maintenance

Best results are achieved under low to medium management levels. It should be mown between 3 and 4 inches. Will tolerate mowing heights at ½ of an inch. **STREETS Seed Mix** should not be used where higher levels of fertilizer and water exist in the management program.

Seeding Rates

- New turf: 7-9 lbs./1000 sq. ft. (350-400 lbs/acre)
- Overseed Rate: 5.5-7 lbs/1000 sq. ft. (250-350 lbs/acre)

Establishment

- Germination: 7-10 days under ideal conditions
- First mowing: 21-30 days
- First limited use: 60-75 days
