

## TALL FESCUE ATHLETIC SEED MIXTURE

Disease-Resistant, Self-Repairing Tall Fescue Mix

**Tall Fescue Athletic Seed Mix** is a combination of three elite turf-type tall fescues with an improved Kentucky Bluegrass. **Tall Fescue Athletic Seed Mix** has the latest generations of tall fescue, with rhizomes that enhance self-repair, speeding establishment, improving traffic tolerance, increasing recovery from damage, dark color, and fine leaf texture that matches well with Kentucky bluegrass. This mixture has extremely good drought tolerance and will perform nicely on a variety of soil conditions. This mix will adapt to full sun to reasonably heavy shade conditions. It is best used where budgets dictate that input levels are low and in fact low levels of input are preferred.

### Tall Fescue Athletic Seed Mix\*

30% 2<sup>nd</sup> Millennium Tall Fescue  
30% Raindance Tall Fescue  
30% Cumberland Tall Fescue  
10% Tirem Kentucky Bluegrass

\*Or equivalent depending on availability...

### Recommended Use

**Tall Fescue Athletic Seed Mix** is ideal for sod production, home lawns, parks and athletic fields. This mix is an alternative option to other Twin City Seed Mixtures where higher levels of traffic are a concern, irrigation does not exist, and soils are less than ideal.

### Suggested Maintenance

Best results are achieved under low to medium management levels. It should be mown between 2 and 3 inches. Will tolerate mowing heights at ½ of an inch.

### KEY FEATURES

- Excellent wear tolerance
- Rapid Recovery
- High Brown Patch Resistance
- Aggressive tillering and early rhizome development
- Greater Seedling vigor and rapid establishment
- Excellent turf quality with early spring green up
- High Stress and drought resistance

### Seeding Rates

- New turf: 8-10 lbs./1000 sq. ft. (350-400 lbs/acre)
- Overseed Rate: 6-8 lbs/1000 sq. ft. (250-350 lbs/acre)

### Establishment

- Germination: 7-10 days under ideal conditions
- First mowing: 21-30 days
- First limited use: 60-75 days
